BlackTechnology

VOLUME 1, ISSUE 1

SEPTEMBER 7, 2010

Class Information

We will be learning technology in a blended learning environment. This means that we will be taking class both in the classroom and on line.

Our online learning classroom is at:

<http://www.udemy.com/technology-excellence-middle-school/>

My classroom website is:

<http://blacktechnology.weebly.com/>

There are ways on both websites for students to access and submit assignments from anywhere they have Internet Access. If they are absent or fall behind there is ample opportunity to complete the work outside of class time.

You will find our classroom policies, contact information, and links to the sites and tools we use in class on BlackTechnology. Much of the same information as well as assignments directions, criteria charts, and rubrics will be found in our online classroom.

Parent information including links to help you navigate the world of 21st century digital parenting are on BlackTechnology.

If you ever have questions, concerns or suggestions, please contact me via e-mail at MBlack@pacek-8.org. I check my e-mail regularly.

Acceptable Use Policy

Every student signed an Acceptable Use Policy Contract at the start of the year. If you did not sign one you are not allowed to use the computers and particularly the Internet. Our AUP states that you will

use the computers and the Internet for instructional purposes only at school and that you will listen to and follow the directions of your teachers. Any student who breaks this contract by visiting sites that were not teacher

directed more than once will need to have a parent conference with Ms. Black before they may use a school computer again.

This policy is for the safety of our students as well as school equipment.
